Thank You!

Dear Mr. Kivett,

When cancer struck my family, it struck hard. I was diagnosed with colon cancer in 1995. My mother died the following year of cancer of the pancreas. Then my husband, Randy, was diagnosed with prostate cancer. My entire family was frightened and wondering, "Who's next?" Cancer can cause so much fear, but I was determined to beat it.

I immediately turned to the American Cancer Society for answers. As I went through treatment, I was so excited to be alive. I wanted to get out and celebrate my life. In 1997, I attended my first Relay For Life[®]. Watching other cancer survivors complete the overnight walk just amazed me. I knew if all those people could survive cancer, I could too. It gave me hope. It's got to be the most awesome walk in the world.

Relay For Life is such a special event for those who participate. It's a chance not only to raise funds to further the fight against cancer, but also to rally with others touched by cancer. Survivors celebrate their lives while loved ones lost to this disease are remembered and honored.

Relay For Life is just one way the American Cancer Society unites communities to fight cancer and improve the quality of life for thousands of cancer patients. Relay has meant so much to me, and I want to thank donors like you for your generous support. Your gifts ensure the Society is able to fund lifesaving cancer research, provide information and services to cancer patients and their loved ones, and advocate for laws which further the fight against cancer and support patients and their families. Thank you so much for making a difference.

Sincerely,

Mary Esther Martinez
