

Sample Partially Assembled Instructions

Pre-Assembled or Partially Assembled

What does that mean? Depending upon the product line, 70% - 95% of the Pre-Assembled product is already built, just needing to be attached to the frame which is pre-drilled for fast & easy setup. This option is commonly referred to as a Knock Down unit which has been Pre-viously Assembled then partially disassembled for shipping. (This Knock Down method conforms to standard size shipping requirements to insure reliable & prompt delivery of your order, drastically reduces shipping damage and keeps costs down without sacrificing quality.)

Provided are (often illustrated) assembly instructions for quick setup within minutes. Also included is all hardware needed for the project. All you'll need is a screwdriver (electric one preferably)! Note: The assembly line drawing on this page would be the most assembly needed. Many times, the whole arm attachment is already put together for you.

You'll also get *FREE* home delivery - - - 

All of our outdoor furniture is made from genuine cedar (unless otherwise noted) giving it a distinct advantage over the elements of nature whether finished or left unfinished.

We are showing this generic sample instructions because our vendor has asked that we not publish their actual instructions for copyright reasons. If you are concerned at all about assembling the item you are considering, please give us a call and we are happy to discuss it with you.
